Chronic Wasting Disease 2005

Finding Answers for Cervid Producers

National Animal Health Monitoring System, Chronic Wasting Disease 2005 Study

Chronic Wasting Disease and the Cervid Industry

Chronic wasting disease (CWD) is of major concern to cervid producers—not only because it is a fatal disease but also because some research suggests that healthy animals may be infected when placed in facilities or geographic areas previously contaminated with CWD. To assist cervid producers and enhance their ability to market their products, the U.S. Department of Agriculture's (USDA) Animal and Plant Health Inspection Service (APHIS) is developing a CWD certification program for farmed and captive cervids.

During the program's certification process, USDA's National Animal Health Monitoring System (NAHMS) will launch the CWD 2005 study by administering a questionnaire aimed at gathering information about potential risk factors that contribute to the transmission and spread of CWD. The CWD study will mark the first time that epidemiologic data has been collected on the Nation's cervid industry and may help to develop strategies that will lead to the elimination of CWD in farmed and captive cervids.

How You Can Help

By participating in this voluntary study, you will help your industry by contributing reliable and valuable information that will be used to:

- Better understand potential risk factors for transmission and spread of CWD,
- Define and summarize current management practices and trends,
- Help legislators and industry make informed decisions, and
- Help university researchers and private enterprises identify and focus on vital issues related to your business.

the questionnaire or in datasets. No individual's data will be reported. In fact, we insist that each questionnaire remain anonymous and will ask only for geographic location by State in order to facilitate reporting at regional levels.

NAHMS Studies

- National in scope
- Voluntary, confidential
- Statistically reliable
- Scientifically valid
- Collaborative in nature

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, sexual orientation, or marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 14th and Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice and TDD). USDA is an equal opportunity provider and employer.
